**DSC 680, Project 1 – Stained Glass Chatbot**

10 Questions an audience would ask me

1. How does the JSON file work?
2. Why do you need a Deep Neural Network?
3. Can it do other things besides answer stained-glass questions?
4. Is there a way to change the probability percentage so it gives better responses?
5. What are some of the questions the chatbot can answer?
6. Do the questions have to be very specific?
7. What is the goal of the responses to the queries?
8. Can you add more information to the chatbot for better answers?
9. Can this be used for something other than stained glass?
10. Can it display images as well as text?
